

Attorney Docket # 4100-261

Patent

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re Application of

Andreas BERCHTOLD et al.

Serial No.: 09/851,918

Filed: May 09, 2001

For: Scanning Method and Scanning Apparatus for  
Optical Density Measurement

Examiner:

Group Art:

I hereby certify that this correspondence is being deposited with the United States Postal Service with sufficient postage as first class mail in an envelope addressed to: Assistant Commissioner for Patents, Washington, D.C. 20231, on

June 29, 2001

(Date of Deposit)

Klaus P. Stoffel

Name of applicant, assignee or Registered Representative

June 29, 2001

Date of Signature

Assistant Commissioner for Patents  
Washington, DC 20231

INFORMATION DISCLOSURE STATEMENT

SIR:

In compliance with the duty of disclosure under 37 C.F.R. § 1.56 and in accordance with the practice under 37 C.F.R. §§ 1.97 and 1.98, the Examiner's attention is directed to the documents listed on the enclosed Form PTO 1449. Copies of the listed documents are also enclosed.

The present Information Disclosure Statement is being submitted within three months of the filing of the present application.

The person signing below certifies that each item of information contained in the present Information Disclosure Statement was cited in a communication from a foreign patent office in a counterpart foreign application not more than three months prior to the filing of the

present statement. The enclosed references were cited in a German application corresponding to the present application.

German reference 32 20 093 discloses a device for measuring color density and moving, web-shaped printing materials. Applicants do not have an English language translation of this reference readily available. However, an English language abstract thereof is enclosed.

German reference 31 48 076 discloses an arrangement for measuring and controlling the ink density of a print. An English language abstract of this reference is also provided.

German reference 32 18 166 discloses a device for measuring the color density of a moving sheet or web-shaped print material. Applicants also do not have an English language translation of this reference. However, an English language abstract thereof is enclosed.

German reference 30 46 417 discloses an apparatus for controlling a rotary printing machine. Applicants do not have an English language translation of this reference readily available.

German reference 19 650 223 discloses a scanning device for a pixel-by-pixel photoelectric measurement of a measured object. This reference is discussed in greater detail in the specification of the present application and the Examiner's attention is respectfully directed to that discussion. Furthermore, this reference corresponds to U.S. Patent No. 6,028,682, a copy of which is also enclosed.

The present invention defines specific scanning method for operating a scanning apparatus for optical density measurement of at least one measurement object arranged on a printing medium which is not believed to be disclosed by the enclosed reference.

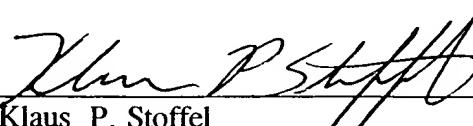

It is respectfully requested that the above information be considered by the Examiner and that the copy of the enclosed Form PTO-1449 be returned indicating that such information has been considered.

In accordance with 37 C.F.R §§1.97(g) and (h), the filing of this Information Disclosure Statement should not be construed as a representation that a search has been made or that information cited is, or is considered to be, material to patentability as defined in §1.56(b), or that any cited document listed or attached is (or constitutes) prior art. Unless otherwise indicated, the date of publication indicated for an item is taken from the face of the item and Applicant(s) reserve(s) the right to prove that the date of publication is in fact different.

If any fees or charges are deemed required at this time in connection with the application, the same may be charged to our Patent and Trademark Office Deposit Account No. 03-2412.

Respectfully submitted,  
COHEN, PONTANI, LIEBERMAN & PAVANE
